

**Amendments to the Specification:**

Please change the title of the application to JPEG2000 FILE CONTAINING METADATA.

Please replace the Abstract with the following paragraph.

A JPEG2000 file includes a plurality of boxes containing data suitable to render an image including a metadata box that includes information within the box describing the content of the image. The information within the metadata box describing content may be MPEG-7 data, which is compliant with the MPEG-7 specification.
